

To Whom It May Concern:

October 15, 2003

Ref: ClearCon

ClearCon was a clearing contractor used by Visions Pipeline (General Contractor) for the construction of an 18.2 mile natural gas transmission pipeline. The pipeline was built under the Federal Energy Regulatory Commission (FERC) guidelines as the first interstate pipeline for SCG.

Construction began March 3, 2003 with clearing being one of the first activities. ClearCon cleared approximately 145 acres to include the tree sawing, tree removal, grinding, and hauling of chips. 75% of these activities were conducted safely on a right-of-way that paralleled a high voltage transmission line.

ClearCon conducted their business in a safe manner that met SCG's needs then and now.

If you have any questions, please feel free to contact me.

Sincerely

Barry L. Mills

SCG Project Engineer
